

Nureva™ Span™ Workspace

For accelerated visual collaboration

Bridge the gap between paper and pixel to accelerate your essential collaborative processes. With Span Workspace, teamwork is fast, fluid and effective – whether you're all in the same location or dispersed around the world.

Span Workspace is a cloud-based solution that lets you create an unlimited number of digital canvases to visualize ideas and map processes. Anyone with a subscription can invite other users or guests to a canvas, and everyone can work together on it in real time, using any device. Familiar tools, including sticky notes, sketches, images and templates, help you shift from paper to digital collaboration without compromising your proven processes.

With expansive canvases and easy-to-use tools, Span Workspace is the virtual collaboration solution your team has been looking for.

Create content

Share ideas using a variety of flexible tools. Notes let you quickly add ideas to a canvas, while text boxes allow more room to capture complex thoughts. Sketches are ideal for drawing and wireframing, and images can provide visual inspiration. All can be moved, edited, hyperlinked, duplicated and grouped as needed. In addition, screen sharing enables information from multiple live applications to be shared to the same canvas, creating an even more dynamic collaboration space.

Discover Span Workspace • nureva.com/visual-collaboration/span-workspace

Organize everything

Use intelligent groups to keep your content accessible and organized. Subgroups and color coding help everyone see at a glance how ideas fit together. For more complex tasks, Span Workspace makes it easy to create custom templates from scratch or convert your paper-based templates into dynamic digital tools. You can also choose from a selection of commonly used business templates.

Collaborate anywhere

Contribute to a canvas anytime, anywhere and on any device. Synchronous and asynchronous inputs are possible from all team members, whether they're colocated or working at a distance. And with the QuickShare feature, even people without a Span subscription can easily share ideas.

Optimized for the Nureva Wall

Using Span Workspace with a Nureva Wall gives

teams even more room to visualize ideas and processes. It combines an ultra-short-throw HD projector with a capacitive touch surface to transform virtually any wall into a space for rich, visual collaboration. For more details, visit nureva.com/visual-collaboration/nureva-wall.

BENEFITS

Encourages big-picture thinking • Working with ideas on an expansive canvas helps team members spot patterns and connect ideas

Tools to share	
Share a canvas	Invite guests or subscribers to collaborate. Set individual permission levels on a canvas to view, contribute, edit or manage.
QuickShare	Enable anyone with a device to contribute notes and images, even without a Span subscription, by scanning a QR code or entering an access number.
Screen sharing	Share your screen to a canvas while others are also sharing their screens simultaneously.
Export	Export any canvas as a PDF or an Excel® file.

Accelerates collaborative processes • Digitally transform agile, lean, design thinking and other processes with familiar tools that you can tailor to your needs

PRODUCT SHEET

Span Workspace

Tools to create	
Canvas	Create a blank canvas to capture and organize ideas. Canvases start at 40' (12.19 m) but can be extended to 200' (60.96 m).
Notes	Type or ink on a digital sticky note. Duplicate, change colors or add a hyperlink.
Text box	Enter up to 2,000 characters of text and resize as needed. Duplicate, choose from 10 text colors or add a hyperlink.
Sketch	Open a blank sketch for quick inking. Duplicate, ink in 10 colors, erase or add a hyperlink.
Image	Import images in most standard formats. Duplicate, resize or add a hyperlink. Write or sketch over images and edit annotations as needed.
Copy and paste	Copy and paste content from one canvas to another.
Tools to organize	
Intelligent groups	Create a group to organize content. Drag items in and out or resize as needed. Assign a color so any note added to the group will turn that color.
Customizable templates	Convert images into dynamic templates, or choose from a selection of commonly used business templates.

Enables access anywhere • Cloud-based software lets people work together in real time, no matter where they are

Reduces groupthink • Users can create and organize content in their personal tray before sharing it to the canvas

Simplifies sharing • With easy access to guest accounts and the QuickShare feature, it's simple to gather feedback and ideas from a wide range of people

Works with all devices • Team members can use Span Workspace on their phones, tablets, Chromebook™ computers, laptops, interactive displays and the Nureva Wall

WALL SOFTWARE ADDITIONAL FEATURES

without leaving Span Workspace. Capture content into the canvas and add annotations.

- Insert a digital flip chart. Add multiple pages, write in 10 colors, move and erase.
- Lock a canvas in place and then easily unlock when panning is needed
