

Nureva™ Wall

WM408i

For expansive visual collaboration

Highly collaborative groups need room – to plan every step and visualize every insight. The Nureva Wall WM408i system offers you an expansive interactive space to accelerate your team processes like never before.

The system combines a solid-state, ultra-short-throw HD projector with a capacitive touch surface to create an interactive working wall that enhances a wide range of collaborative activities. With the help of Span™ software, the Nureva Wall digitally

transforms agile, lean, design thinking and other essential processes by creating space for rich, visual collaboration.

Expanded space to work

Make your walls interactive with a solution that gives everyone the space they need to tackle challenging problems and keep complex projects on track. The Nureva Wall provides wall-sized working spaces that leverage ultra-short-throw projection, yielding the lowest

price per pixel for any display technology.

Precise interactive touch

Keep everyone working efficiently together with a touch surface that features the same advanced technology found in the latest smartphones. With virtually any lighting conditions or wall type, you can count on responsive and accurate touch performance. And with 40 simultaneous touch points per dual system, the Nureva Wall supports engaged teamwork and collaboration among a large number of contributors.

Flexible configurations

Create a workspace tailored to your team's needs. Nureva Wall configurations can be as small as 7' 6" (2.30 m) wide or as large as 60' (18.29 m) wide. The systems can span the length of a wall, be placed in a corner or wrap around an entire room for immersive collaboration.

Easy installation

Install the system on almost any wall. An interlocking feature lets you easily combine more than one touch panel, and a USB interconnection cable enables multiple systems to be controlled by one computer.

Powered by Span software

Span software, available as a subscription, is optimized for use with the Nureva Wall. This cloud-based collaboration software gives groups the flexible tools they need to visualize ideas and map processes. With Span software, people can work together anywhere, using any device, allowing for synchronous and asynchronous collaboration. Learn more at nureva.com/visual-collaboration/span-software.

Benefits

Encourages big-picture thinking • Seeing ideas on a large workspace helps group members spot patterns and connect ideas

Increases collaboration • 40-point multitouch (on each dual system) means multiple team members can easily work together on the wall. People can also use their devices to interact with content at the same time.

Accelerates processes • Digitally transform agile, lean, design thinking and other processes with familiar tools that you can tailor to your needs

Simplifies teamwork • The system's automated start-up experience and intuitive, flexible tools help teams to work together effectively without distraction

Optimizes your space • The flexible design of the Nureva Wall makes it well suited to a wide variety of spaces, from huddle rooms to conference rooms to underused hallways and team spaces

Blends into your walls • The touch surface's lowprofile bezel and slim design keep the focus on ideas, not technology

PRODUCT SHEET

Computer requirements

Projector details	
Resolution	1920 x 1080
Aspect ratio	17:9
Image size	7' 6" x 47" (2.29 x 1.19 m) (100" or 2.54 m diagonal)
Brightness	3600 ANSI lumens
Light source	Solid state illumination (SSI)
Room-control	Crestron ready
Dimensions (w x h x d)	15.1" x 3.4" x 12.1" (38.3 x 8.6 x 30.8 cm)
Net weight	15.2 lb. (6.9 kg)
Performance	
Touch technology	Projected capacitive touch
Touch points (multitouch)	20 points per 100" panel
Functionality	
Power button	Wake/home/sleep
Presence detection	Wake/sleep; 104° H; 90° V
Multipanel connectivity	Up to four boards reporting to one PC
Dimensions	89 ¼" x 51 ¾" x 7 ⅛" (226.6 x 130.4 x 2.4 cm)
Net weight	75 lb (34 kg)

WHAT'S INCLUDED

Nureva SSI 1080p projector

Nureva wall mount

Works with a variety of applications • Run all your Windows® applications on the Nureva Wall

Windows® OS 10 or higher (64 bit only) .NET framework 4.6 or higher

Nureva 100" diagonal (2.54 m) touch panel

USB A-B cable

Touch panel+5V DC power supply with country-specific adapters

NUREVA ROOM MANAGER

Easily adjust image alignment, configure multiple systems and recalibrate for better touch accuracy. The Room Manager ensures firmware and related software are up to date and gives you easy access to documentation and product help. It also lets you manage other Nureva products, including the HDL300 audio conferencing system.

MINIMUM OPERATING REQUIREMENTS

Wall software

Functionality	
Image resolution	1920 x 1080
Processor	x86 or x64 Minimum Intel® i5 or higher
RAM	8 GB minimum
Video memory	1 GB
Graphics processor	Direct® 9.0 compatible or better
Video ports	x2 minimum of either HDMI or DisplayPort
USB	2.0 high-speed port

The Nureva Wall requires a customer-provided computer running Windows 10 or higher.
