# Nureva™ Span™ software

Span software draws upon the familiar tools teams already use to kick off their innovation process. Create notes, images and other content on your personal devices and contribute to the team canvas in the cloud.

Canvas	Digital artifacts
Capture, organize and refine ideas in this expansive team workspace just as you would work with sticky notes, flip charts and images on a wall. Teams can work in a 10' or 20' (3.1 or 6.1 m) wide digital space and pan horizontally over a total of 40' (12.2 m). A subtle background helps contributors stay oriented within the digital space as they add and organize their digital artifacts.	Express ideas as different types of digital content, each with specific functionality. Notes mimic paper sticky notes for rapid-fire ideation. Sketches are ideal for drawing and wire-framing. Flip charts make it easy to park ideas or capture action items. Images provide visual inspiration. All can be moved, edited, duplicated and grouped as needed.
Personal apps	**Cloud software**
Access a canvas through Chrome and Safari browsers or via apps on iOS and Android tablets. Create a collection of digital artifacts and store them in your tray while editing. Drag them onto the canvas when ready to share. Synchronous and asynchronous inputs are possible from all team members, whether colocated or working at a distance.	Contribute to a canvas anytime, anywhere, as often as needed. Everyone contributes in real time so the canvas is up-to-date. And because you have a subscription, your software always has the latest features. Creativity and collaboration can be planned or ad hoc. Work is never lost.

Key features

Note	Enter text into a digital note that resembles a standard sticky note. Duplicate, delete and change color, or convert into a heading for a group.
Sketch	Create a virtual blank page for quick inking. Move, duplicate, delete, sketch in three colors and erase.
Image	Import images in any standard format at any resolution. Move and resize directly on the canvas.
Flip chart	Insert a digital flip chart. Add multiple pages, write in three colors, move and erase.
Group	Create a group to organize content. Drag notes, sketches, images and even other groups in and out, or resize the borders to group nearby content.
Export	Export the canvas as a PDF or an Excel® file.

Minimum operating requirements

Room software	Windows® OS 8.1+
Device apps	Android™ OS 4.4+, iOS 8.1+
Web client	Chrome™ browser v.44+, Safari® 9+ (running Mac OS X 10.10+)
